4 General Provisions

1 Scope

This quote amends JustOn's quote to CMI dated 20 August 2026 ("Phase 1 of the CMI Membership project"). Following CMI's internal review of its target solution architecture, CMI has selected Emma for membership operations and a combination of FinDock and Stripe for the B2C payment journey. As a result, JustOn's role in CMI's overall solution is now focused on CMI's B2B invoicing (bulk contracts and pay-as-you-go invoicing), delivered natively on Salesforce through JustOn Billing & Invoice Management.

The B2C billing and payment solution described in JustOn's quote of 20 August 2026, including the use of JustOn Cash Management with Mollie as payment provider for Affiliate Memberships, is not part of this quote. CMI has confirmed that B2C invoices processed via FinDock and Stripe, expected at approximately 150,000 per year, will also be recorded centrally in JustOn as pre-settled payments; the licensing set out in section 2.1 reflects this combined B2B and B2C invoice volume. How post-payment events such as refunds or adjustments processed outside JustOn are reflected in the ledger will be addressed as part of the Specification Phase.

This quote builds on the solution design for CMI's B2B invoicing presented in February 2026. In line with CMI's preferred approach, it commissions the two elements required now so that the implementation can be completed before the end of CMI's financial year in March 2027: the licensing for B2B invoicing, and a five-person-day Specification Phase to review the existing solution design and to confirm the open design decisions. The full implementation will be scoped and quoted separately, based on the results of the Specification Phase.

This quote refers to the following documents, which will be reviewed and, where required, updated as part of the Specification Phase described in section 2.2:

- JustOn Solution Design Presentation "Bulk and PAYG Contracts", presented to CMI and shared on 4 February 2026
- JustOn Solution Proposal for CMI (Bulk Contracts, PAYG Contracts), April 2025

CMI has set a target to complete the project by the end of March 2027. To meet that timeline, JustOn needs to reserve the corresponding project resources now. Ordering the license and the Specification Phase is the commitment required to secure those resources and allow the project to begin without delay.

2 Specifications and Costs

2.1 License Pricing

JustOn's licensing pricing is primarily determined by three factors: the number of invoices generated, the number of users, and the number of legal entities within a single Salesforce and JustOn instance. This pricing model ensures flexibility and scalability, allowing businesses to tailor their usage according to their specific needs and growth.

To efficiently manage various legal entities within a single Salesforce and JustOn instance, the Enterprise Edition is required. This edition provides the necessary features and capabilities to handle complex organisational structures, allowing businesses to maintain accurate records and ensure compliance across all entities.

Pos	Description	Qty.	Total
1	JustOn ENTERPRISE Edition - incl. one business entity - incl. 2 admin user licenses - incl. Billing & Invoice Management for up to 165,000 invoices per year - incl. Maintenance	1	2,252.25 £
2	Business Entity License - allowing the use of JustOn Billing & Invoice Management for 3 additional legal entities in the same instance (4 in total, as confirmed with CMI) - Price per entity: 210 £	3	630.00 £
3	JustOn Cash Management - Add-on for automated payment processing and reconciliation - Automated import of bank statements (CAMT.053) for all incoming payments that are not processed through a payment service provider, which applies to the majority of B2B bulk and PAYG payments - Automated matching of incoming payments against open invoices, as the basis for receivables reporting and dunning - incl. the right to use it in 4 legal entities - Should CMI wish to process payments through a payment service provider at a later stage, JustOn Cash Management supports the connection of a provider such as Mollie or Stripe (Q1 2027). This is not part of this quote and would be scoped and quoted separately.	1	349.00 £

Pos	Description	Qty.	Total
4	Additional User Licenses (per seat) - Price per multi tenant user license: 34.60 £ - More user licenses can be ordered on demand, if the included user licenses are not sufficient.	10	346.00 £
5	Read-only User Licenses (per seat) - Price per read-only user license: 10.26 £ - For team members who need visibility into invoices and reporting, without edit rights	10	102.60 £
Monthly License Costs (net)			3,679.85 £
Annual Payment (net)			44,158.20 £

Pricing is based on a 36 month contract term and already includes the duration discount.

What happens when you grow?

Additional users: You can add Full Access user licenses at any time for 34.60 £ per user per month, as well as Read-only users for 10.26 £ per user per month. Reductions in user licenses are possible at the end of the respective contract term, but only down to the number of users included in the main license.

Additional invoices: Should you generate more invoices than the booked quantity within a contract year, a price of 8.55 £ per month is deemed agreed for each additional package of 1,000 invoices per year (minimum package size). Reductions in invoice packages are possible at the end of the respective contract term, but only down to the number of invoices included in the main license.

Additional Business Entities: A monthly fee of 210 £ is charged for each additional client (subsidiary) within the same Salesforce instance. The booked users and invoice quantity of the main license are available as a shared contingent for all clients. If additional users or invoice packages are required, these can be added at any time under the conditions stated above.

2.2 Specification Phase

The Specification Phase reviews the existing solution design for CMI's B2B invoicing (bulk contracts and pay-as-you-go invoicing) against CMI's current target architecture, and additionally covers the ledger treatment of the centrally recorded B2C invoices and the migration of existing open invoices into the new setup. It results in the following deliverables, which form the basis for the subsequent implementation quote:

- Review of the existing solution design, documenting where it remains valid and where updates are required
- A consolidated list of the open design decisions required from CMI. This includes CMI's decision between Proposal 1 (order-oriented) and Proposal 2 (payment-oriented) for bulk contracts, as presented in February 2026, and any changes to CMI's Salesforce and CRM landscape since then that affect the scope, e.g. the Creatio integration for PAYG data and the CMI PartnerConnect registration system launched in January 2026

- Definition of how post-payment events (e.g. refunds or adjustments) for the centrally recorded B2C invoices, processed outside JustOn, are to be reflected in the ledger
- Assessment of the approach and scope for migrating CMI's existing open invoices into the new setup
- Updated effort estimate for the full implementation
- Updated project plan, including a proposed go-live date aligned with the end of CMI's financial year in March 2027

The Specification Phase is based on the existing solution design and on CMI's responses to the open design decisions. It does not include the creation of a new solution design. Should the review reveal material changes to the scope defined previously, the resulting design work will be quoted separately.

The Specification Phase is scheduled to start once this quote is signed and CMI's project resources are available, with the deliverables expected within four weeks of the start date.

2.3 Specification Phase Pricing

Pos.	Description	Qty.	Price	Total
1	JustOn Specification Phase Review of the B2B invoicing scope (bulk contracts and PAYG) as defined, including the ledger treatment of the centrally recorded B2C invoices and the migration of existing open invoices, resulting in an updated solution design, effort estimate, and project plan for the full implementation.	5 PT	1,070.00 £	5,350.00 £

The Specification Phase is fixed at 5 person days for the purposes of this quote, invoiced as a one-off project fee upon completion (see section 3). Depending on what the review of the B2C ledger treatment and data migration scope surfaces, additional effort may be required; should this be the case, it will be flagged transparently before any additional work is carried out.

JustOn staff members operate at a daily rate of 1,070.00 £.

At present, we do not anticipate any need for specific software feature development or enhancements that would require software development services. Should such a requirement arise during the specification phase, it will be subject to separate analysis and assessment, and it may be necessary to provide an additional proposal.

3 Execution, Contract Term & Invoicing

The licenses set out in section 2.1 are provided **free of charge from the date of signature until 30 November 2026**. This allows CMI to use JustOn Billing & Invoice Management during the Specification Phase without incurring license fees.

The initial contract term is 36 months, commencing on the effective date of 1 December 2026. The period provided free of charge does not count towards the initial term.

After the initial term, the contract automatically renews for successive periods of 12 months, unless either party provides written notice of termination at least 60 days prior to the end of the initial term or of any renewal period.

License invoicing is conducted annually in advance, with the first invoice issued on 1 December 2026.

The Specification Phase described in section 2.3 is invoiced as a one-off project fee upon completion, independently of the license invoicing described above.

4 General Provisions

The current version of the JustOn Terms of Use applies to the use of the license (<https://www.juston.com/en/terms-of-use/>).

The quote is valid until 18 September 2026.

The prices and conditions set out above only apply under the following conditions:

- The quote is accepted no later than the Quote Validity Date and is signed by JustOn.
- The start of the contract, and thus the activation of the licenses, takes place at the time of the contract start defined above.

Should acceptance of the quote be delayed, or the start of the contract not be possible at the defined time, the conditions granted may deviate or no longer be granted.

JustOn is not responsible for project deferrals caused by the customer, notably:

- Events and conditions occurring on the part of the customer beyond the control of JustOn.
- Delays in gathering required data.
- Relocation of staff (responsible contacts) or management decisions that affect recommendations by or agreements with JustOn.

If the configuration of the application is not carried out by JustOn's specialist staff, but by CMI itself or by a third party commissioned by CMI, an online meeting with JustOn Support is required before the first support request, so that JustOn can be informed about the configuration carried out and the adjustments made.

Unless otherwise described, JustOn does not deliver Salesforce licenses.

Upon signing, the customer orders JustOn to provide the deliverables specified in this quote.
